Collect results from the template for each i and write them back later.

1 Now i is 1

```
print(i)

## [1] 1

iris[i, ]

##   Sepal.Length Sepal.Width Petal.Length Petal.Width Species
## 1          5.1         3.5          1.4         0.2  setosa
```

2 Now i is 2

```
print(i)

## [1] 2

iris[i, ]

##   Sepal.Length Sepal.Width Petal.Length Petal.Width Species
## 2          4.9           3          1.4         0.2  setosa
```

3 Now i is 3

```
print(i)

## [1] 3

iris[i, ]

##   Sepal.Length Sepal.Width Petal.Length Petal.Width Species
## 3          4.7         3.2          1.3         0.2  setosa
```
