Create link texts in the data:

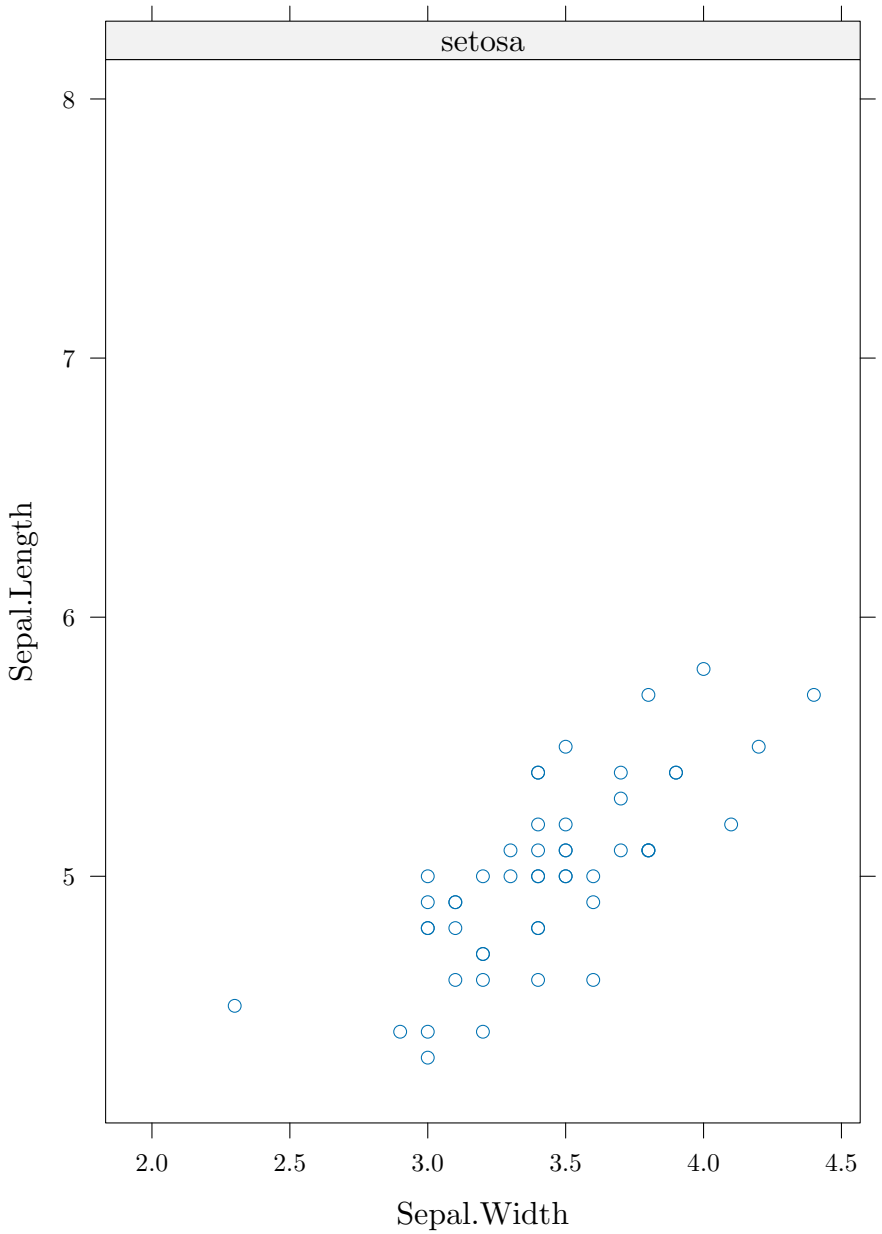

```
library(lattice)
data(iris)
iris$hyperlink <- paste("\\hyperlink{", iris$Species,
    "}{", iris$Species, "}", sep = "")
iris$hypertarget <- paste("\\hypertarget{", iris$Species,
    "}{", iris$Species, "}", sep = "")
```

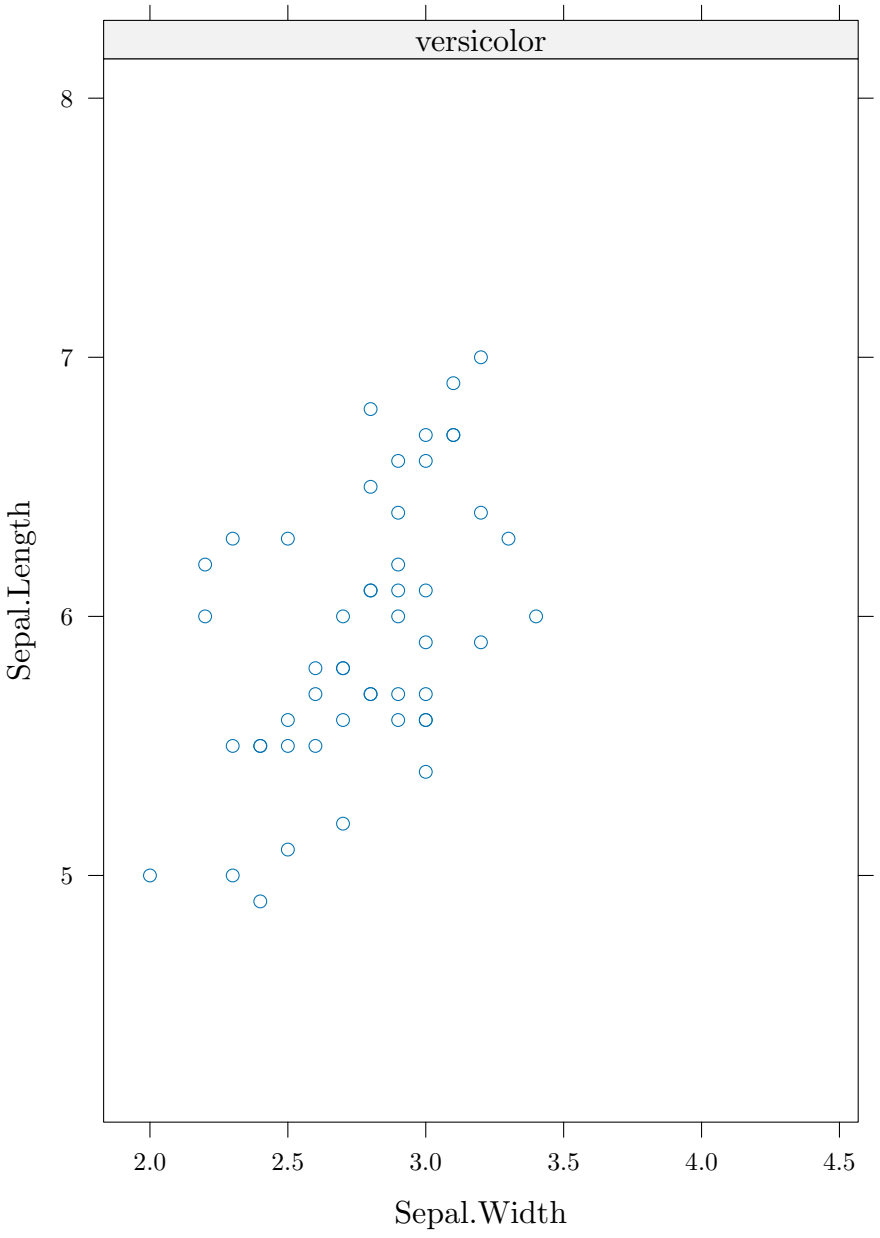

Draw these texts in plots (you can click on the labels):

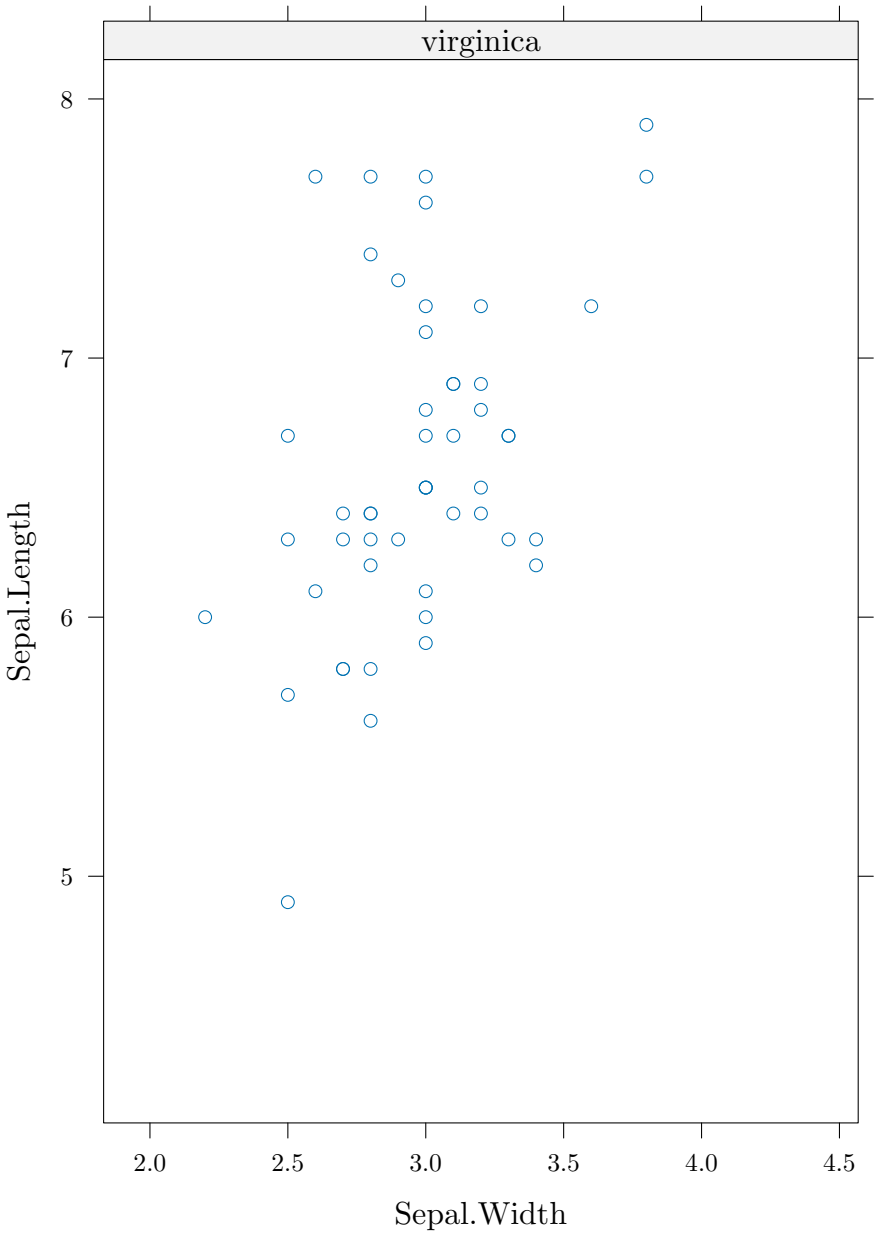

```
xyplot(Sepal.Length ~ Sepal.Width | hyperlink, data = iris)
```

virginica
setosa
versicolor
Sepal.Length
Sepal.Width
8
7
6
5
2.0
2.5
3.0
3.5
4.0
4.5

```
xyplot(Sepal.Length ~ Sepal.Width | hypertarget, data = iris, layout = c(1,
    1))
```

versicolor
Sepal.Length
Sepal.Width
8
7
6
5
2.0
2.5
3.0
3.5
4.0
4.5

Note the option external has to be FALSE here, otherwise LaTeX will not be able to find the link target in the document.
