The tikz Device

Yihui Xie

October 19, 2026

First you need to install the tikzDevice package, e.g.

```
install.packages("tikzDevice")
```

Then just specify `dev='tikz'` in the chunk header, and you are done.

```
plot(1, xlab = "$x_i$", ylab = "$y_i$", main = "Isn't \\LaTeX{} Awesome?")
text(1, 1, "The font style is consistent\n\n with your document")
```
