```
library(knitr)
knit_hooks$set(wrapper = function(before, options, envir) {
    sprintf("\\begin{alltt}%s\n\\end{alltt}", if (before)
        sprintf("<<%s>>=", options$params.src) else "@")
})
```

I want to display `<<>>=` in the output since I'm writing a tutorial:

```
<<test_label, wrapper=TRUE, eval=FALSE>>=
1 + 1
plot(1)
@
```

Another approach was mentioned in FAQ 9 (`https://github.com/yihui/knitr/blob/master/FAQ.md`), i.e. destroy the chunk header. Here is an example:

```
<<test_label, echo=1:2>>=
1 + 1
rnorm(10)
2 + 2
@
```
