A bug reported at `https://d.cosx.org/d/110742`.

```
library(knitr)
library(rgl)

## Error in ‘library()‘:
## !  there is no package called ’rgl’

knit_hooks$set(rgl = hook_rgl)

## Error:
## !  object ’hook_rgl’ not found

head(hook_rgl)  # the hook function is defined as this

## Error:
## !  object ’hook_rgl’ not found
```

Then we only have to set the chunk option `rgl=TRUE`:

```
library(rgl)

## Error in ‘library()‘:
## !  there is no package called ’rgl’

plot3d(data.frame(x = rnorm(100), y = rnorm(100), z = rnorm(100)), col = rainbow(100))

## Error in ‘plot3d()‘:
## !  could not find function "plot3d"

par3d(zoom = 0.8)

## Error in ‘par3d()‘:
## !  could not find function "par3d"
```
